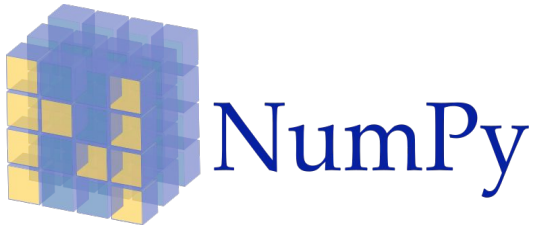
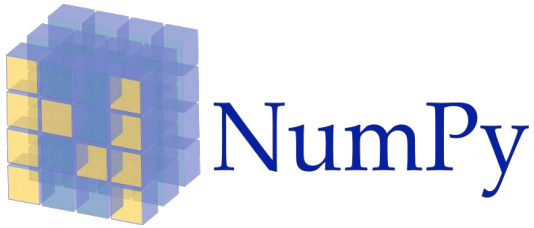
Important Libraries for Data Science

Important Libraries for Data Science



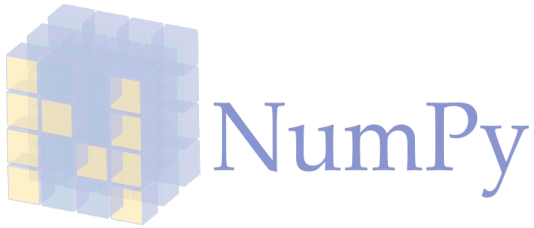
Important Libraries for Data Science

- **Numpy** - Efficient N-dimensional arrays, linear algebra, random number capabilities



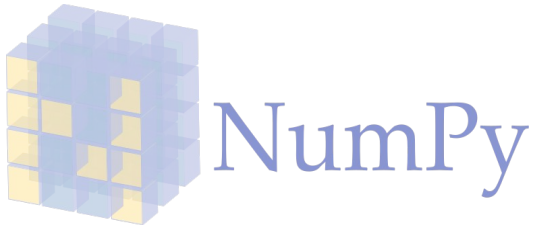
Important Libraries for Data Science

- **Numpy** - Efficient N-dimensional arrays, linear algebra, random number capabilities
- **Scipy** - Scientific computing tools like calculus, signal processing



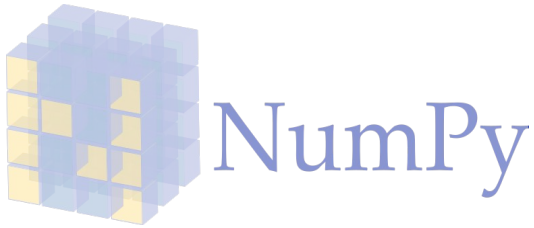
Important Libraries for Data Science

- **Numpy** - Efficient N-dimensional arrays, linear algebra, random number capabilities
- **Scipy** - Scientific computing tools like calculus, signal processing
- **Pandas** - Data reading (multiple formats), manipulation and cleaning in Python



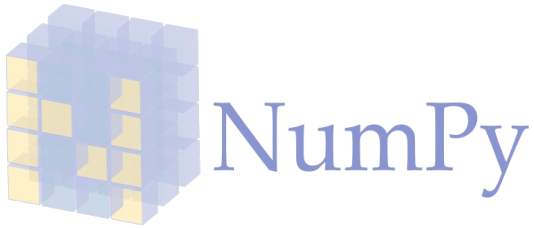
Important Libraries for Data Science

- **Numpy** - Efficient N-dimensional arrays, linear algebra, random number capabilities
- **Scipy** - Scientific computing tools like calculus, signal processing
- **Pandas** - Data reading (multiple formats), manipulation and cleaning in Python
- **Matplotlib** - Fundamental library for data visualization in Python



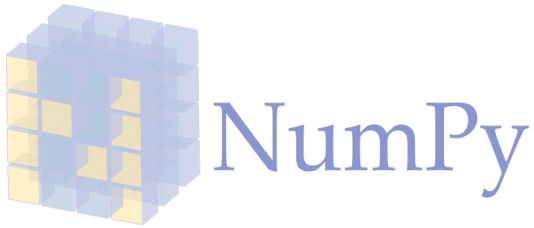
Important Libraries for Data Science

- **Numpy** - Efficient N-dimensional arrays, linear algebra, random number capabilities
- **Scipy** - Scientific computing tools like calculus, signal processing
- **Pandas** - Data reading (multiple formats), manipulation and cleaning in Python
- **Matplotlib** - Fundamental library for data visualization in Python
- **Seaborn** - Built on top of Matplotlib, It provides a high-level interface for drawing attractive and informative charts



Important Libraries for Data Science

- **Numpy** - Efficient N-dimensional arrays, linear algebra, random number capabilities
- **Scipy** - Scientific computing tools like calculus, signal processing
- **Pandas** - Data reading (multiple formats), manipulation and cleaning in Python
- **Matplotlib** - Fundamental library for data visualization in Python
- **Seaborn** - Built on top of Matplotlib, It provides a high-level interface for drawing attractive and informative charts
- **Statsmodel** - statistical models, statistical tests, statistical data exploration



Important Libraries for Data Science

- **Numpy** - Efficient N-dimensional arrays, linear algebra, random number capabilities
- **Scipy** - Scientific computing tools like calculus, signal processing
- **Pandas** - Data reading (multiple formats), manipulation and cleaning in Python
- **Matplotlib** - Fundamental library for data visualization in Python
- **Seaborn** - Built on top of Matplotlib, It provides a high-level interface for drawing attractive and informative charts
- **Statsmodel** - statistical models, statistical tests, statistical data exploration
- **Scikit-Learn** - Basic data preprocessing, Machine Learning library

Python Basics: Summary

Python Basics: Summary

Variables & Data Types

Variables, data types etc.

Python Basics: Summary

Variables & Data Types

Variables, data types etc.

Operators

Arithmetic, Comparison etc.

Python Basics: Summary

Variables & Data Types

Variables, data types etc.

Operators

Arithmetic, Comparison etc.

Control Flow

The if statement, loops - for and while etc.

Python Basics: Summary

Variables & Data Types

Variables, data types etc.

Operators

Arithmetic, Comparison etc.

Control Flow

The if statement, loops - for and while etc.

Data Structures

List, Tuple, Set, Dictionary etc.

Python Basics: Summary

Variables & Data Types

Variables, data types etc.

Functions

Built-in, user-defined, lambda etc.

Operators

Arithmetic, Comparison etc.

Control Flow

The if statement, loops - for and while etc.

Data Structures

List, Tuple, Set, Dictionary etc.

Python Basics: Summary

Variables & Data Types

Variables, data types etc.

Functions

Built-in, user-defined, lambda etc.

Operators

Arithmetic, Comparison etc.

File Handling

Reading, writing text files

Control Flow

The if statement, loops - for and while etc.

Data Structures

List, Tuple, Set, Dictionary etc.

Python Basics: Summary

Variables & Data Types

Variables, data types etc.

Functions

Built-in, user-defined, lambda etc.

Operators

Arithmetic, Comparison etc.

File Handling

Reading, writing text files

Control Flow

The if statement, loops - for and while etc.

Data Structures

List, Tuple, Set, Dictionary

Modules & Packages

Module, standard library, package etc.

Python for Data Science: Tasks

Python for Data Science: Tasks

Reading data files

Python for Data Science: Tasks

Reading data files

Subsetting, Modifying data

Python for Data Science: Tasks

Reading data files

Subsetting, Modifying data

Preprocessing, Aggregating data

Python for Data Science: Tasks

Reading data files

Subsetting, Modifying data

Preprocessing, Aggregating data

Visualizing trends and patterns

Python for Data Science: Tasks

Reading data files

Subsetting, Modifying data

Building ML Models

Preprocessing, Aggregating data

Visualizing trends and patterns
